

GOL Mobile

Native application for iOS and Android, interconnected with your GOL IBE account

Search

Search by various criteria.

Native app

Native, installed app brings you and your customers quicker and smoother experience.

Automated but customisable

GDS reservations with an automated system distributing fully customisable graphic and text client notifications and documents.

Custom branding

Custom branding based on your agency's unique style.

Define fees and commissions

Possibility to define service fees and commissions by various criteria.

All on the go

Your customers have all the tickets and bookings created on your agency website or through your agency app with them, on the go.

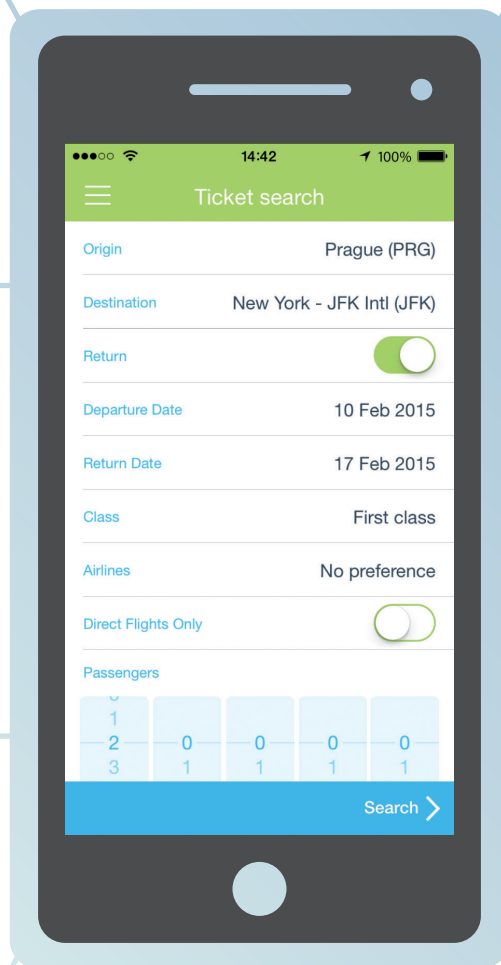

Online payment systems

Support of online payment systems. Once your client pays through a payment gateway, his or her e-ticket is automatically issued and delivered via email.

Back Office

Access to a well-arranged Back Office for all system settings and administration of created reservations.

Customised app to fit agency's branding.
